PROFESSIONAL SUMMARY

Data and operations analyst with 9 years of analytics work at Teleperformance Malaysia across digital-advertising integrity, e-commerce, payments-risk and customer-operations programmes. Four of those years were spent analysing advertising and social-media content at scale for a global platform — 74,000+ contents reviewed and 9,000+ advertising partners supported, with QA accuracy above 95% — and today I produce the daily, weekly and monthly performance analytics for five accounts supporting 80 agents, including demand forecasting. Hands-on with Python (pandas), SQL, Power BI, Tableau and Looker Studio through certified analytics coursework and published dashboards. Published researcher (three journal papers); Lean Six Sigma Green Belt; analytics specialisations from Google, Wharton and UC Davis; native Indonesian speaker working in English across the Malaysian and Indonesian markets.

CORE SKILLS

- Data Analysis: Python (pandas, NumPy, Matplotlib, Seaborn), SQL (MySQL), Microsoft Excel (Pivot Tables, Pivot Charts, VLOOKUP, HLOOKUP), data cleaning and validation, exploratory analysis, SPSS, NVivo
- Business Intelligence: Power BI (DAX, Power Query), Tableau, Google Looker Studio, KPI dashboard design
- Operational Analytics: SLA, AHT, occupancy and adherence analysis, intraday reallocation, forecasting and capacity planning, shrinkage, performance trend analysis
- Reporting & Stakeholders: Hourly / daily / weekly / monthly reporting, KPI dashboards, escalation reporting to operations leaders, cross-functional partnering
- Tools: Git and GitHub, Zendesk, Braintree (payment fraud checks), WordPress / Joomla, HTML / CSS / PHP / MySQL, Google Analytics, Microsoft 365
- AI-Assisted Analysis: hands-on use of generative-AI agents for research, data gathering and reporting automation in personal workflows
- AI & Automation: agent and persona design, instruction and task-boundary design, tool/API integration (MCP), scheduled workflow automation, human-in-the-loop approval, response-quality evaluation and rubrics

PROFESSIONAL EXPERIENCE

Workforce Management Analyst — (5 Accounts) Kuala Lumpur, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | Feb 2025 – Present | coverage expanded to 5 accounts, Aug 2026

- Produce hourly, daily, weekly and monthly performance reporting for five accounts (advertising platform, banking, automotive, gaming and consumer goods) supporting 80 agents, turning live queue and performance data into decisions for operations leaders.
- Analyse SLA, AHT, occupancy and adherence data to find staffing gaps and emerging service risks, and recommend corrective action fast enough to protect service levels.
- Analyse historical volume and workload data to forecast demand and align staffing and capacity plans with business trends.
- Deliver performance insights and escalation reports to operations leaders, shortening time-to-decision on emerging service risks.
- Apply Lean Six Sigma process analysis to operations workflows: map manual, repetitive steps, quantify where time and errors concentrate, and document the improved process so it holds without supervision.

Real-Time Analyst — Fraud & Global Payment Risk Kuala Lumpur, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | May 2024 – Jan 2025

- Owned workforce planning and real-time management for the Fraud and Operational Risk department.
- Analysed historical workload data to forecast staffing needs against fraud-detection requirements, and built workforce optimisation strategies that kept staffing at plan.
- Designed and maintained fraud-detection processes and workflows with cross-functional teams.
- Monitored KPIs and service levels and prepared reporting and analytics to support resource planning and strategic decisions.

Real-Time Analyst — E-Commerce & Video Hosting Petaling Jaya, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | Mar 2023 – May 2024

- Monitored real-time contact-centre metrics — contact and ticket volumes, agent availability, service-level and latency adherence — and adjusted plans to hit service goals.
- Produced hourly, daily, weekly and monthly reports highlighting trends and recommending improvements.
- Analysed performance data to identify gaps, implemented action plans and escalated risks to management in time to act.

Real-Time Analyst — B2B Airline Penang, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | Nov 2022 – Mar 2023

- Monitored service level, handle time and abandonment rate in real time, adjusting staffing and call routing to improve performance.
- Built and maintained performance reports and analysed historical data to surface trends and process improvements.

Legal Partner Operations Analyst — Advertising & Social Media Penang, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | Jan 2021 – Nov 2022

- Supported 9,000+ high-profile partners over 10 months while holding a QA accuracy score above 95%.

- Protected user privacy and data rights, ensuring safe and trusted connections between people, businesses and the platform.

Business Integrity Analyst — Advertising & Social Media Penang, Malaysia

Teleperformance Malaysia Sdn Bhd | Full-time | Jul 2018 – Jan 2021

- Reviewed 74,000+ social-media advertising contents against platform policy, labelling each item against written criteria.
- Named Quarterly Top Performing Partner in 2020 for consistent quality and throughput.

Customer Service Representative — E-Hailing Kuala Lumpur, Malaysia

Sutherland Global Services Sdn Bhd | Full-time | Oct 2016 – Aug 2017

- Resolved 8,800+ customer complaints over one year across phone, email, chat and social channels, following every case to closure within time limits.
- Handled escalations and collaborated with other departments on complex customer issues.

Research Analyst Pekanbaru, Indonesia

Research Institution of Riau University | Full-time | Jan 2013 – May 2013

- Delivered one research project and one symposium over five months.
- Built, maintained and analysed the research database, and wrote the research report and presentation material.

AI AUTOMATION & AGENT OPERATIONS (PERSONAL / OWN BUSINESS)

- Built and operate a 7-agent AI system with distinct personas, tool integrations and 20 scheduled workflows; 128 runs logged across 11 days (121 completed), with per-run logging and documented failure handling.
- Designed and operate a 10-workflow content operation that researches, drafts, illustrates and publishes daily to WordPress, LinkedIn, Facebook, Instagram and TikTok through WordPress, Buffer and Metricool APIs — instrumented rather than demoed: 99 logged runs (5-15 Oct 2026), 94 completed, nine written operating procedures loaded before each run, and human approval before every publication.
- Encoded guardrails and human-approval gates so no outbound action (publish, apply, contact) runs without review; added evidence-based verification for links and claims.
- Documented agent specifications, workflow diagrams and failure handling. Scope: agent operation and automation — not model development.

PROJECTS

Portfolio: ahmadsalehnasution.github.io

Malaysian Stock Market Dashboard & Stock Screener (2025) — Google Looker Studio dashboard screening stocks on key metrics, with real-time data and custom filters.

Exploratory Data Analysis — Top 10 Indonesian YouTubers (2023) — Python (pandas, Matplotlib, Seaborn) analysis of the top 10 Indonesian YouTube channels, visualised into a professional report.

FIFA 2023 Dashboard (2023) — Power BI dashboard on club and player performance, comparing L. Messi and Cristiano Ronaldo across rating, wage, value and statistics.

US Flight Delay Dashboard (2023) — Tableau dashboard on the statistical causes of US flight delays, with the data validated in Excel first.
